#### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter I of the Patent Cooperation Treaty)

(PCT Rule 44bis)

Applicant's or agen 92002578PCT2	t's file reference	FOR FURTHER ACTION	See item 4 below
		nternational filing date (day/month/year) 0 September 2022 (30.09.2022)	Priority date (day/month/year) 30 October 2021 (30.10.2021)
	Classification (IPC)	or national classification and IPC T/ISA/237	•
Applicant HUAWEI TECHN	OLOGIES CO., LTI	D.	
		port on patentability (Chapter I) is issued by ty under Rule 44 <i>bis</i> . I(a).	he International Bureau on behalf of the
2. This REPO	RT consists of a total	of 5 sheets, including this cover sheet.	
		nce to the written opinion of the International eport on patentability (Chapter I) instead.	Searching Authority should be read as a reference
3. This report	contains indications i	relating to the following items:	
$\boxtimes$	Box No. I	Basis of the report	
	Box No. II	Priority	
	Box No. III	Non-establishment of opinion with reapplicability	egard to novelty, inventive step and industrial
	Box No. IV	Lack of unity of invention	
$\mathbf{X}$	Box No. V	Reasoned statement under Article 35	(2) with regard to novelty, inventive step and industria

4. The International Bureau will communicate this report to designated Offices in accordance with Rules 44bis.3(c) and 93bis.1 but not, except where the applicant makes an express request under Article 23(2), before the expiration of 30 months from the priority date (Rule 44bis.2).

Certain defects in the international application

Certain observations on the international application

Certain documents cited

applicability; citations and explanations supporting such statement

	Date of issuance of this report 30 April 2024 (30.04.2024)

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

### PCT/CN2022/123378

Box	No.	I Basis of the opinion
1.	Witl	h regard to the <b>language</b> , this opinion has been established on the basis of:
1.	<b>7</b>	the international application in the language in which it was filed.
		a translation of the international application into which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).
2.	1	This opinion has been established taking into account the <b>rectification of an obvious mistake</b> authorized by or notified to this Authority under Rule 91 (Rule 43bis.1(b)).
3.		With regard to any <b>nucleotide and/or amino acid sequence</b> disclosed in the international application, this opinion has been established on the basis of a sequence listing:
	a.	forming part of the international application as filed.
	b.	furnished subsequent to the international filing date for the purposes of international search (Rule 13ter.1(a)),
		accompanied by a statement to the effect that the sequence listing does not go beyond the disclosure in the international application as filed.
4.		With regard to any nucleotide and/or amino acid sequence disclosed in the international application, this opinion has been established to the extent that a meaningful opinion could be formed without a WIPO Standard ST.26 compliant sequence listing.
5.	Add	itional comments:

## WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

#### PCT/CN2022/123378

Box No. V Reasoned statement ur citations and explanati		n)(i) with regard to novelty, inven ch statement	tive step and industrial applicab
1. Statement			
Novelty (N)	Claims	1-30	YES
	Claims	None	NO NO
Inventive step (IS)	Claims	1-30	YES
	Claims	None	NO
Industrial applicability (IA)	Claims	1-30	YES
	Claims	None	NO

#### 2. Citations and explanations:

D1: WO 2021196054 A1

D1 is the closest prior art document, and discloses (see description, page 12, line 1 to page 37, last line): an encoding method for a polar code, comprising: respectively acquiring a first bit and a second bit, the type of the first bit being a known bit, and the type of the second bit comprising at least one of a frozen bit, a parity check bit or an information bit; generating a pilot sequence on the basis of the first bit; encoding the second bit to obtain a first encoding sequence; and when determining to send the pilot sequence, sending a second encoding sequence to a decoding device, wherein the second encoding sequence comprises the pilot sequence and the first encoding sequence. A decoding method for a polar code, comprising: receiving a message from an encoding apparatus, the message comprising a subsequence to be decoded, the subsequence comprising a first bit, and the type of the first bit being a known bit; and using the type of the first bit as a target type, and decoding the first bit according to a first decoding algorithm corresponding to the target type, the target type comprising a parity check bit or a frozen bit.

#### Novelty

Claim 1 at least differs from D1 by: determining a first frozen bit sequence on the basis of a probability distribution value P1 of a first information bit sequence.

Claim 11 at least differs from D1 by: on the basis of an ith probability distribution value in a probability distribution value set P and a frozen bit sequence corresponding to an ith probability distribution value, decoding a sequence to be decoded.

D1 does not explicitly or implicitly disclose the technical solutions of claims 1-30. Therefore, claims 1-30 are novel in the sense of PCT Article 33(2).

#### Inventive Step

It would not have been possible for a person skilled in the art to obviously arrive at the technical solutions of claims 1-30 from any combination of D1 and common general knowledge. Therefore, claims 1-30 involve an inventive step in the sense of PCT Article 33(3).

#### Industrial Applicability

The technical solutions of claims 1-30 can be made or used in industry, and thus, claims 1-30 are industrially applicable in the sense of PCT Article 33(4).
